AI-Sahayak: Scheme Summary

English Summary

Digital India Initiative: Consolidated Summary

1. Eligibility

- Open to all Indian citizens, with a focus on rural and underserved populations.
- Specific events or services may have additional eligibility criteria, such as age (typically 15+), profession (e.g., IT professionals, students, government officials), or location (various states across India).
- Businesses, startups, government entities, universities, and industry professionals can also participate in certain initiatives.
- Registration on platforms like DigiLocker, UMANG, or CSC may be required for some services or events.

2. Benefits

- Access to digital services and platforms, including document storage (DigiLocker), government services (UMANG), skill development (CSC), and entity management (EntityLocker).
- Support for startups and businesses through recognition, funding, mentorship programs, and access to digital infrastructure developments.
- Improved cybersecurity awareness, data protection measures, and knowledge about emerging technologies and digital initiatives.
- Enhanced digital infrastructure and services for rural areas, including internet connectivity, digital literacy programs, and access to resources like India's common compute capacity.
- Opportunities for networking, skill development, and engagement in digital initiatives through workshops, events, and interactive sessions with industry experts and government officials.

3. How to Apply

- Register on relevant platforms (e.g., DigiLocker, UMANG, or CSC Academy) or official event websites/portals to access services or participate in events.
- For specific events, coordination with respective authorities (e.g., universities) or obtaining invitations may be required.
- Participate in training programs, workshops, and events organized under the Digital India

initiative.

- Stay updated on upcoming events, webinars, and awareness campaigns to engage with the initiative.

- Utilize the Common Service Centers (CSCs) for various digital services and support in rural areas.

Digital India Initiative: Consolidated Summary

1. Eligibility

- Open to all Indian citizens, with a focus on rural, underserved populations, and specific groups like farmers, students, and youth.

- Targets students, educators, government officials, professionals, businesses, startups, and entrepreneurs in the technology sector.

- Some events may require invitations, specific credentials, or be tailored to certain regions or professions (e.g., CISO Workshop for cybersecurity professionals, university-specific workshops).

- Borrowers seeking financial assistance through Common Service Centers (CSC) loan outreach.

2. Benefits

- Promotes digital literacy, awareness, and skill development through workshops, talk shows, and events.

- Enhances digital infrastructure, services, and governance, encouraging the adoption of e-services.

- Supports the growth of the technology industry, startups, and farmer welfare through technology-driven interventions (e.g., PM-KISAN).

- Provides platforms for knowledge sharing, networking, and policy insights, such as the India Mobile Congress, SEMICON India, and AI Impact Summit 2026.

- Offers financial inclusion and loan facilities for underserved borrowers.

- Breaks language barriers and promotes multilingualism through initiatives like Bhashini.

3. How to Apply

AI-Sahayak: Scheme Summary

- Attend workshops, talk shows, and events organized under the Digital India initiative, with registration typically required through official government portals or event-specific websites.
- Participate in online platforms and portals like BHASHINI, DigiLocker, and EntityLocker.
- Engage with government schemes and initiatives related to digital transformation, financial inclusion, and farmer welfare.
- Stay updated through official Digital India communications, announcements, and consultations, which may require invitations for specific events.
- Collaborate with government bodies, industry partners, and academic institutions for specific projects, opportunities, and university-specific workshops.

Final Consolidated Summary

1. Eligibility
- Open to various sectors, including farmers (e.g., PM-KISAN scheme).
- Targets individuals and institutions interested in AI, digital technologies, and skill development.
- Includes those seeking to break language barriers through initiatives like Bhashini.
- Suitable for individuals looking to enhance their skills through future-ready training programs (e.g., FutureSkills PRIME).

2. Benefits
- Access to financial services and welfare benefits (e.g., PM-KISAN).
- Promotion of AI and digital technologies for sectoral growth.
- Opportunities for skill development and future-ready training.
- Breaking language barriers and enhancing digital inclusion through initiatives like Bhashini.

3. How to Apply
- Participate in Digital India awareness workshops and talk shows at educational institutions.
- Engage with initiatives like PM-KISAN for farmer welfare benefits.
- Attend events such as the AI Impact Summit 2026 and SEMICON India 2025 for networking and learning.

AI-Sahayak: Scheme Summary

- Utilize platforms like the UMANG app for various services and activations.

- Access financial services through CSC's loan outreach program.
